

# CFNIL Scholarships

## LEARNING OPPORTUNITIES

"Help me get to know your school and the needs of your students! This year we will be scheduling Scholarship Success Planning Meetings. Within the next couple of weeks, I will be reaching out to set up a time to discuss your specific goals and how we can differentiate the scholarship learning process for your staff and students." - Heather Rapp, Scholarship Associate

### Student & Support Focused

#### Scholarship Presentation

General information about our programs and a custom walk-through of the scholarship application. The presentation can be adjusted to fit your needs and time constraints!

#### Workshops

With CFNIL there to help, students can start filling out the first stage of the application and be matched with scholarships. We can then provide tips and tricks to construct a compelling essay.

#### Classroom Mini-Lesson

Foster a deeper level of engagement by scheduling a real-world connection mini-lesson for a senior content area class.  
BONUS -Teacher participation artifacts!

#### Career & Scholarship Events

Does your school have your own Career Day or Scholarship Fair? We'd love to talk about working in the non-profit sector and share information about our scholarship program.

#### Student News Collab

Do you have a student-produced news channel, newspaper, or podcast? I'll work with your news crew to provide info/interviews so they can teach their peers about scholarship opportunities.

#### ScholarSIP Coffee Talks

I'll bring the coffee! Schedule an informal meeting or at P/T conferences to empower students and their support system in preparing for their next steps.

### Educator & Staff Focused

#### SIP/ Institute day

Meet professional learning standards and touch on elements of Danielson, by empowering your staff to recognize how they play a direct role in preparing students for success beyond the classroom.

#### Staff Meetings/ PLCs

Scholarships are for everyone! We offer several scholarships for students whose next chapter of learning may not be with a traditional 4-year college program.
